[*British Seagull Engine*](#)

British Seagull started in 1931 and amazingly enough it's still going strong and in British hands - almost unique! For its time the original engine was very advanced, a good proportion of the original engines are still running and parts are generally still available to keep them that way - a truly unique engine, a magnificent piece of British ...

The Supermarine Seagull was a amphibian biplane flying boat designed and produced by the British aircraft manufacturer Supermarine. It was developed from the experimental Supermarine Seal.. Development of the Seagull started during 1920; it heavily drew upon the prior Supermarine Commercial Amphibian programme. Flown for the first time on 2 June 1921, it was evaluated for military applications ...
